

**Portable External Form Vibrators for Precast**

**A-05 WEDGE**

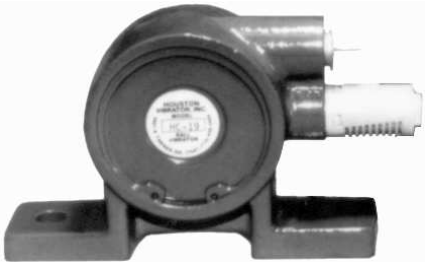

**A-05 BRACKET**

A-05 Series Portable Form Vibrators from Houston Vibrator allow you to quickly and easily move pneumatic vibrators from one form to the next during production—minimizing your cost and maximizing your productivity.

The A-05 Bracket is permanently attached to each location on your forms that requires vibration. The vibrator is then mounted on the form using the A-05 Wedge.

The Portable A-05 Wedge/Vibrator Assembly weighs 29 pounds at most, making it easy to move from one location to the next.

Assemblies are available with five different heavy-duty pneumatic vibrators to meet the needs of your application.
